Muhammad Ridho

Engineering Manager at Red Ant Colony | Bussiness Lead at Treon
South Kalimantan, Indonesia

Summary

Hey, I'm Ridho. I'm a Software Engineer who loves design. I'm currently building Design System at Ruangguru and Crafting Amazing things at Ruangkerja, an LMS for a training company or organization.

I start my career as a Designer right after graduating from Senior high school. After 1 year, I decided to join the coding boot camp. After that, I entered the world of IT as a software engineer. I have worked with many startups. On top of that, I am so glad I have had opportunities to lead and grow the team starting from the early stage of my career.

I am a highly motivated and enthusiastic person who enjoys taking on challenges and achieving personal goals. I am adaptable, responsible, hardworking, and detail-oriented. I enjoy working on my own initiative or in a team.

Please read through my profile, and I look forward to collaborating with you!

Experience

Red Ant Colony

1 year

Engineering Manager

October 2025 - Present (3 months)

Yogyakarta, Indonesia

Frontend lead

May 2025 - September 2025 (5 months)

Senior Frontend Developer

January 2025 - May 2025 (5 months)

Yogyakarta, Indonesia

TreonStudio
co-founder, Business Lead
June 2025 - Present (7 months)
Yogyakarta, Indonesia

Ruangguru
5 years 9 months
Senior Frontend Engineer
February 2022 - October 2024 (2 years 9 months)
Jakarta, Indonesia

Contribution to 3 Teams, As FE Lead in Ruangkerja, Mentorship to the CRM Team

- Became front-end (FE) lead for RUKER team (6 FE engineers) and was responsible for all of its client-side platforms (Web, Mobile, and CMS) using ReasonML, TypeScript, Flow, JS, React, React Native, Next.js). Made sure that the team members were able to grow and stay happy while ensuring that the RUKER team met the business needs and its technical debt "payment." Also heavily involved in driving RUKER's FE architecture (including Revamp our Mobile App from Old React Native Arch into new React Native Arch.

- Worked with various teams and stakeholders during the ideation, screening, execution, and retrospection phase, ensuring that only the most impactful features were shipped into production while keeping the deadline in check.

- Heavily involved in Ruangguru's new FE engineer hiring. This involvement results in a faster FE engineering hiring process while ensuring that only technical and culturally fit candidates pass.

- Collaborate with UI Designer to build Ruangguru design system, cross platform (Mobile - Web) using react native, react, and tamagui

- Mentorship and doing 1 on 1 with FE Members Team, Respond to complaints and help provide some suggestions to them.

Software Engineer
November 2019 - February 2022 (2 years 4 months)
Greater Jakarta Area, Indonesia

Contribution to the CRM team. A platform that aims to help Sales friends with regards to sales, such as vouchers, sales packages, and absences for school visits.

- During this period, based on the condition of the team, which at that time lacked members, I took the initiative to learn a few things and do backend engineering work.

- Training some backend friends to learn frontend about web development. Like, React js, Reasonml, and others. And help some FE friends on my team if they experience problems carrying out tasks

- Involved in Ruangguru's new FullStack engineer hiring process by assessing their computational thinking and problem-solving skills through coding challenges.

Junior Frontend Engineer

February 2019 - November 2019 (10 months)

Greater Jakarta Area, Indonesia

Part of the Enterprise Team, a team that aims to create a platform that can make it easier for divisions in Ruangguru.

Create an integrated attendance application using React Native and create a Design - Product Flow, which aims to help sufficient absences, permits, and leave in 1 application. So that employees do not need to make manual letters / permits to the office, which can make it easier for HR as well as managing employee attendance

Neumedira Indonesia

Associate Product Manager

August 2023 - November 2023 (4 months)

Banjarbaru, South Kalimantan, Indonesia

Kitabisa.com

Frontend Engineer

July 2017 - January 2019 (1 year 7 months)

Yogyakarta Area, Yogyakarta, Indonesia

Building Kitabisa, The #1 trusted fundraising and donation platform in Indonesia.

- Assigned to translate the designs provided by UI designers into a Web using JavaScript Framework, CSS, Sass, and several JavaScript libraries using API.
- Discuss and collaborate with various stakeholders to improve existing products, from Product, CTO, to CPO
- Taking the initiative to create a template system for existing B2B landing pages, so that we can optimize existing Product Engineering resources up to 40%
- Taking the initiative to introduce ReactJS and some of the new Frontend Architectures to engineering friends who were there, who previously used the JQuery system, monolithic FE - BE mixed, so that the current code base is more comfortable to maintain so that it is more scalable.

STIKES Husada Borneo

IT Support Technician

June 2016 - January 2017 (8 months)

Jalan A. Yani KM.30,5 No.4, Guntungmanggis, Landasan Ulin, Banjarbaru
